### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 19 November 2003.
- 2a) ☒ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

2. Claims 15 and 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Fleischer et al.

Re claim 15, Fleischer et al. discloses a vehicle driveline parking brake assembly a moveable driveline component (18), a stationary driveline component (20) that remains stationary relative to a portion of the vehicle, a braking member (not shown but disclosed in column 6, lines 27-28) associated with the movable driveline component (18) such that the braking member remains stationary relative to the moveable driveline component, an engaging portion (11) associated with the stationary driveline component (20), the engaging portion selectively movable into a braking position where the engaging portion engages the braking member, a spring (13) that biases the engaging portion into the braking position and an electrically powered actuator (1) that selectively moves the spring and releases the engaging portion out of the braking position. (Figures 1 and 2) It is the examiner's position that at least the portion of the

braking member that is attached to the engaging portion (11) would be stationary relative to the moveable driveline component (18).

Re claim 17, Fleischer et al. discloses wherein the electrically powered actuator (1) maintains the spring (13) in a compressed position to keep the engaging portion out of the braking position. (column 6, lines 29-33)

***Allowable Subject Matter***

3. Claims 16 and 18-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

4. Applicant's arguments filed November 19, 2003 have been fully considered but they are not persuasive.

Applicant argues that Fleischer et al. does not teach a moveable driveline component and a stationary driveline component that cooperate with the parking brake arrangement. It is the examiner's position that applicant's arguments are more specific than the claim limitations. As broadly claimed, the movable driveline component is readable as the piston (18) and the stationary driveline component is readable as the housing (20) which are clearly integral operating components of the brake. Further, applicant's stationary driveline component is a housing. Therefore, it is unclear how

applicant's claimed limitation differs from the housing of Fleischer et al. and the rejections above are maintained.

### ***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
